

ENVIRONMENTAL POLICY CIVIL WORKS SPECIFIC

D G MILLS LTD acknowledges its responsibility towards its employees, customers, neighbours and the general environment, taking into consideration the economic, financial and technical requirements of the business.

The company is committed to comply with applicable environmental laws, regulations and relevant standards that meet legislative and regulatory requirements. BS EN ISO 14001:2015 shall be the standard employed for the company Environmental Management System.

This policy will be reviewed on a regular basis and revised to reflect the latest developments.

The company is committed to the following principles:

1. To improve the environmental awareness of employees and relevant others and will train and teach them to enable support for our environmental efforts.
2. To assess equipment, projects and processes to determine environmental impacts.
3. To, where reasonably practical, source products and services that have the least environmental impact.
4. To reduce waste through re-cycling and re-use and by using recycled and refurbished products where such alternatives are suitable and practical to use.
5. To monitor relevant impacts, discharges and emissions to air, land and water to assess what action is necessary to reduce pollution or the risk of pollution.
6. To develop and maintain emergency procedures for effectively dealing with significant hazards where they exist and limiting the risk to the environment.
7. To set annual environmental objectives and targets agreed at the Management Reviews. Objectives shall be implemented based on the positive effect on the environment versus the affordable cost to the business.
8. To continually improve the Management System through audits, management reviews, and any other routine system process.
